

I, Jody Purrington, Duluth, MN, respectfully urge Congress to extend the wind energy production tax credit (PTC) as quickly as possible.

I have seen the wind farms near my hometown of Windom, MN revitalize my community. Here in Duluth, MN, I am able to purchase wind energy from our utility company, Minnesota Power. Increasing the amount of power that our country gets from clean, homegrown, affordable resources is an excellent thing for us to do – and this tax credit provides an incentive for the wind industry to continue to do just that.

I urge the committee to take up an extension of the wind energy production tax credit right away.

Sincerely,

Jody Purrington
